

SMA MIXTURES QC/QA MSP-99-03

1.0 Description. The incentive/disincentive sections of the Bituminous Mixture QC/QA specification for adjusting payment to the contractor for Stone Mastic Asphalt (SMA) will not apply to any contract with a bid opening prior to July 1, 2000. All QC/QA incentive/disincentive sections for SMA will apply to all contracts with a bid opening on or after July 1, 2000.

1.1 The contractor and/or suppliers shall comply with the requirements of this contract and shall exhibit a good faith effort in performing QC testing. Should the contractor and/or suppliers not exhibit this good faith effort, the engineer will suspend the progression of work as outlined in Sec 108.5. In that case, the contractor shall not resume production until a revised process is approved by the engineer in writing.

2.0 Quality Control/Quality Assurance (QC/QA) Training. The University of Missouri at Rolla is providing a training course, as specified elsewhere in the contract, for contractor and supplier personnel involved in the QC/QA specification in this contract to provide information and instructions concerning a QC/QA program.

3.0 Post Construction Report. Upon completion of the project, the contractor and the aggregate producer will be requested to assist in developing a post construction report with the engineer, to include a detailed analysis of the quality control and quality assurance test results.
